Welcome to our 60th Anniversary Bull Group! - 2023 Bulls from Cornell Farms

Real world bulls from a real world cow herd. One of our top group of bulls in years. They weaned heavy and kept on going. The dams have all the convenience traits—good udders and feet, and the ability to raise big calves on forages. No creep feed here! We have many yearlings and some two year olds.

Come early for the best selection. For pictures and videos of some of the bulls go to our website. We look forward to hearing from you so we can help you with your bull selection. Thanks for your support over the years. We enjoy sharing in the excitement of Agriculture with all of you!

The Cornell Family

Definition of Terms

CE: Calving Ease

BW: Birth Weight

AWW: Adjusted Weaning Weight

ADG: Average Daily Gain

SC: Scrotal Circumference

AYW: Adjusted Yearling Weight

FS: A score determined by a mathematical calculation involving age and hip height—an indication of what the mature size of the animal will be.

BW EPD: Measures how much above and below the breed averages an offspring will gain due to the parent.

CE EPD: Predicts the ease with which the progeny of the animal should be born.

WW EPD: Reflects progeny growth difference up to 205 days. **YW EPD:** Reflects progeny growth from weaning age to yearling age,

TM EPD: Combines the genetics for pre-weaning growth and the influence of milk on the weaning weight of the daughter's progeny.

MILK EPD: Indicates the ability of a sire's daughters to provide their calves with an environment which encourages growth from birth to weaning through milk production and mothering ability.
